Relevant Projects

Personal Website: www.abraham-espinosa.site (for additional information and projects)

Disney Movies

- Developed a full-stack web application that displays famous Disney movies and allows users to create movie reviews. Created a RESTful API enabling data to be stored in an online database and built a website to consume the RESTful API.
- Utilized: Java, Spring Boot, React, MongoDB

Flowers E-commerce

- Developed an e-commerce website that allows users to authenticate and interact with products and services. Implemented a transactional email API service to reset the account password.
- Utilized: NodeJS, Express, EJS, Mailgun, MongoDB

PHP Motors

- Constructed a dynamic website that allows users to authenticate and create reviews. Used sessions and cookies to log in.
- Utilized: PHP, MySQL, HTML/CSS

Syphus Budget

- Developed a mobile application with a class team that assists users in tracking cash flow (income and expenses).
- Utilized: Java, Firebase

Income Expense Tracker

- Created a JavaScript application that tracks users' income and expenses. Implemented localStorage property to save records in the browser.
- Utilized: JavaScript, HTML/CSS

Work Experience

The Church of Jesus Christ of Latter-day Saints

Sep 2019 – Oct 2023

Travel and Visa Coordinator

- Planned travel itineraries and prepared all applicants' documentation for a Mexican temporary residency by understanding client's needs, advising them on the most complex cases, and utilizing the most cost-efficient means.
- Implemented Power BI reports by transforming data into actionable information and created SQL queries to provide a friendly interface for the users and reduce data entry errors.
- Built automated applications using Microsoft Power Platform, allowing other organization members to simplify manual processes.
- Leveraged knowledge in Excel, SQL, Access, Power BI, and Microsoft Power Platform.
