Education

Brigham Young University – Idaho

Mar 2018 – Aug 2023

Bachelor of Applied Science in Applied Technology (major GPA: 3.68)

- **Certificates (coursework):** Web Backend Development, Web Frontend Development, Computer Programming
- **Cluster (minor):** Database

Work Experience

Banco Covalto

Feb 2024 – Present

Junio Software Developer

- Design and develop functional full-stack web applications by collaborating with other developers in the Agile team. Fix application issues and code irregularities.
- Code software primarily in PHP and JS by following product specifications and addressing business needs.
- Design and build relational SQL databases that allow to perform CRUD operations.
- Leveraged knowledge in PHP, MySQL, MongoDB, JS, and CI4.

The Church of Jesus Christ of Latter-day Saints

Sep 2019 – Oct 2023

Travel and Visa Coordinator

- Implemented Power BI reports by transforming data into actionable information and created SQL queries to provide a friendly interface for the users and reduce data entry errors.
- Built automated applications using Microsoft Power Platform, allowing other organization members to simplify manual processes.
- Planned travel itineraries and prepared all applicants' documentation for a Mexican temporary residency by understanding client's needs, advising them on complex cases, and utilizing the most cost-efficient means.
- Leveraged knowledge in Excel, SQL, Access, Power BI, and Microsoft Power Platform.

Skills

- Software: (proficiency): PHP, JavaScript, Bootstrap, GIT, SQL, NoSQL (familiar): Java, React, C#, Dotnet
- Language: fluent in English and Spanish

Relevant Projects

Personal Website: www.abraham-espinosa.site (for additional information and projects)

Disney Movies

- Developed a full-stack web application that displays famous Disney movies and allows users to create movie reviews. Created a RESTful API enabling data to be stored in an online database and built a website to consume the RESTful API.
- Utilized: Java, Spring Boot, React, MongoDB

Flowers E-commerce

- Developed an e-commerce website that allows users to authenticate and interact with products and services. Implemented a transactional email API service to reset the account password.
- Utilized: NodeJS, Express, EJS, Mailgun, MongoDB

PHP Motors

- Constructed a dynamic website that allows users to authenticate and create reviews. Used sessions and cookies to save relevant information.
- Utilized: PHP, MySQL, HTML/CSS

Income Expense Tracker

- Created a JavaScript application that tracks users' income and expenses. Implemented localStorage property to save records in the browser.
- Utilized: JavaScript, HTML/CSS
